

Purpose

The MCCF was developed exclusively as an educational resource for NERC Registered Entities in the Midwest Reliability Organization region who are facing mandatory reliability compliance.

The purpose of the MCCF is to:

- Provide a forum for sharing knowledge, lessons learned and best practices regarding compliance matters.
- Advocate consistency of NERC's Compliance Monitoring and Enforcement Program by advising relevant Regional Entities and NERC of possible inconsistent applications. Identify and address issues that may impact the ability of a Registered Entity to comply with NERC Reliability Standards.
- Enhance Registered Entities' understanding of useful tools and techniques to establish and demonstrate compliance with NERC Reliability Standards.
- Share experiences in developing and implementing a successful compliance program.

Vision

Improving Mid-Continent Compliance Forum (MCCF) members' NERC Reliability Standard Compliance Programs through the sharing of experiences, tools, and methods; and promoting best practices that help ensure the reliable operation of the Bulk Electric System.

Membership

Membership in MCCF is open to current employees and approved third parties of NERC Registered Entities in the Midwest Reliability Organization Region. All membership requests will be validated and approved by the Steering Committee.

How to Join

It costs nothing to join the MCCF and the only costs are associated with attending in-person meetings. To request membership, point your internet browser to: www.mccf.biz and click on the *Members Only* button near the top of the page. Follow the instructions to create your account and request access.

Questions?

Please contact a Steering Committee member with any questions! The current MCCF Steering Committee contact information is posted on the MCCF website at www.mccf.biz.
